

the *Probulator*

the secret is in the shape

by 

The scoop-shaped back-probes that take the tussle out of auto-electrical troubleshooting

the Probulator back-probe set includes 1 pair of larger & 1 pair of smaller radius scoop-points for easy entry into nearly all automotive electrical connectors.

-  Enter connector housings without damage to connector or cable.
-  Establish sure electrical contacts within connectors without "hit & miss".
-  Accepts 4 mm \varnothing banana plugs of standard voltmeter & multimeter LT leads.
-  Coated brass scoop-points resist corrosion & enhance structural rigidity.
-  2 pairs per set, offered at a popular price for every electrical meter user.
-  Attractively packaged to sell itself at retail points of sale.
-  Backed by globally respected TecMate after-sales service.
